

Paso 1

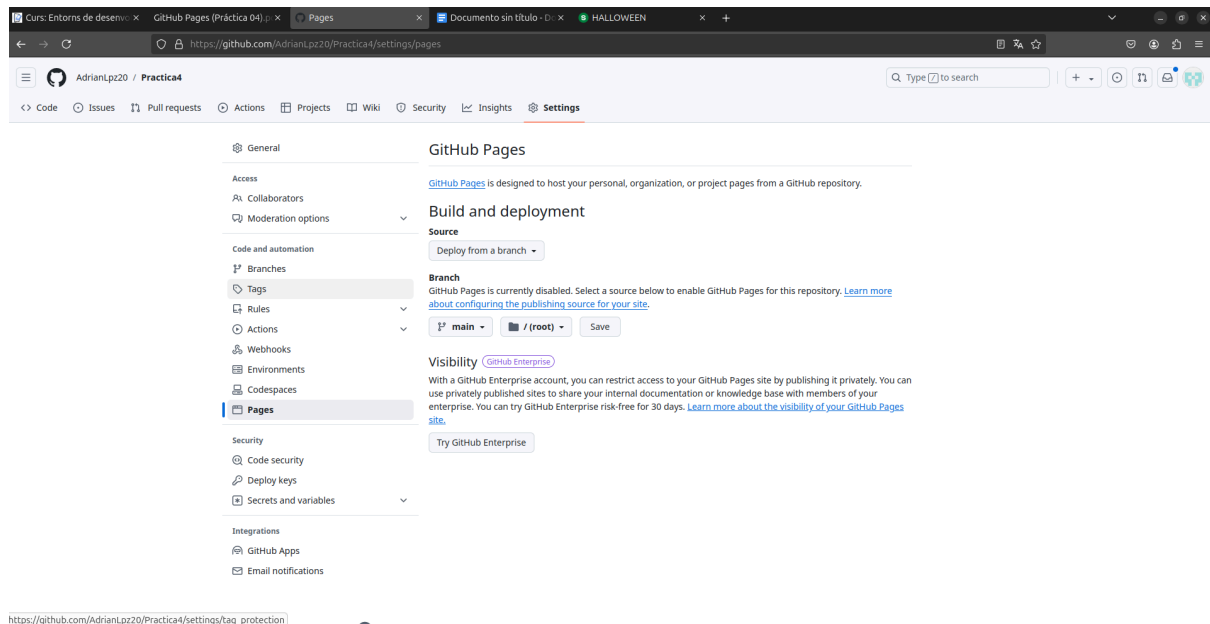

The screenshot shows the 'New repository' page on GitHub. The page title is 'Create a new repository'. Below the title, there is a description: 'A repository contains all project files, including the revision history. Already have a project repository elsewhere? [Import a repository.](#)'. A note states: 'Required fields are marked with an asterisk (*).' The 'Owner' field is set to 'AdrianLpz20' and the 'Repository name' field is 'Practica4'. A green checkmark indicates 'Practica4 is available.'. Below these fields, there is a 'Description (optional)' text box. The 'Public' radio button is selected, with the text 'Anyone on the internet can see this repository. You choose who can commit.' The 'Private' radio button is unselected, with the text 'You choose who can see and commit to this repository.' The 'Initialize this repository with:' section has 'Add a README file' checked. Below this, there is a note: 'This is where you can write a long description for your project. [Learn more about READMEs.](#)'. The 'Add .gitignore' section shows '.gitignore template: None'. Below this, there is a note: 'Choose which files not to track from a list of templates. [Learn more about ignoring files.](#)'. The 'Choose a license' section shows 'License: None'. Below this, there is a note: 'A license tells others what they can and can't do with your code. [Learn more about licenses.](#)'. At the bottom, there is a note: 'This will set `main` as the default branch. Change the default name in your [settings](#).' A footer note states: 'You are creating a public repository in your personal account.'

Paso 2

Paso 3

The screenshot shows the 'Settings' page for a repository named 'Practica4' by user 'AdrianLpz20'. The left sidebar contains a list of settings categories: General, Access, Collaborators, Moderation options, Code and automation, Branches, Tags, Rules, Actions, Webhooks, Environments, Codespaces, Pages, Security, Code security, Deploy keys, Secrets and variables, Integrations, GitHub Apps, and Email notifications. The 'Pages' category is selected. The main content area is titled 'GitHub Pages' and contains the following information: 'GitHub Pages is designed to host your personal, organization, or project pages from a GitHub repository.' Under 'Build and deployment', the 'Source' is set to 'Deploy from a branch'. Below this, the 'Branch' is set to 'main'. A note states: 'GitHub Pages is currently disabled. Select a source below to enable GitHub Pages for this repository. [Learn more about configuring the publishing source for your site.](#)' Under 'Visibility', there is a button 'Try GitHub Enterprise'.
